

Anti-Graffiti Coatings

BEARDOW ADAMS™

Unique Adhesives

Rewrite the rules of graffiti protection with Naturacoat

Superior protection

Protect buildings, monuments, transport infrastructure and support the local economy and social environment, by investing in an anti-graffiti product that is 100% natural and environmentally friendly, is easy to apply and remove, and will not damage objects or buildings.

Beardow Adams has taken its world-renowned reputation for hot-melt adhesives into the anti-graffiti coatings market, to help building owners, managers, architects and surveyors maintain the value of their property and protect important monuments from unsightly and damaging graffiti.

Naturacoat is a sacrificial coating made from vegetable polysaccharides and water that, when applied, adds a thin protective film to substrates that is virtually undetectable to the naked eye, even when wet. Removal of the graffiti is easy, simply use hot water and a pressure washer, no chemicals are required.

Your benefits

- ✓ Protect buildings from graffiti and environmental pollution
- ✓ Suitable for any surface, including natural stone, brickwork, concrete, metal, plastic and ceramics
- ✓ Greater durability compared to other common coatings
- ✓ Provides a thin transparent protective film that is undetectable to the eye, even in wet conditions
- ✓ Fully breathable, vapour permeable coating
- ✓ Quickly and easily remove graffiti with hot water, no chemicals required
- ✓ 100% natural coating consisting of vegetable polysaccharides and water
- ✓ Proven track record with over four million square metres of buildings already protected, including Brandenburg Gate and the Museum of Scotland
- ✓ Manufactured in an ISO 9001 certified environment

Product	NaturaCoat SC 30	NaturaCoat SC 20	NaturaCoat SC 20 Clear
Coatings required	1	2	2
