

Coffee Cup Adhesives

BEARDOW  **ADAMS**™

Unique Adhesives

Coffee Cup Bonding.

FAST ADHESIVES THAT LIKE IT HOT.

The bonds behind the perfect coffee cup

Delivering the perfect bond time and again, our adhesives are uniquely formulated to provide the necessary combination of fast setting, high heat resistance, and strong adhesion integral to coffee cup bonding.

Superior drinking experience is ensured with hot melts that maintain container integrity and insulation performance, helping to keep coffee hot and hands cool and dry.

Used by manufacturers across the globe for single and double-wall cup applications, our hot melts are suitable for a variety of coated papers and cup sizes.

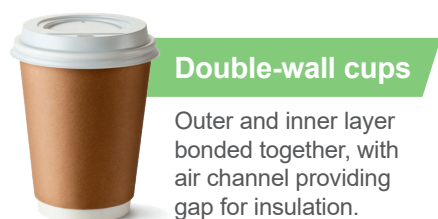

And with grades that do not string or char, even on line speeds running up to 300 cups per minute, our adhesives help boost manufacturing productivity and total cost of ownership.

Supported by an experienced technical team, we work with you throughout the approval process, from specification and small-scale trials, through to laboratory analysis, extended trials and final approval.

Key benefits

- ✓ For double-wall cups and sleeves for single wall coffee cups
- ✓ Suitable for smooth and ripple cups
- ✓ Meets boiling water test with heat resistance up to 100°C (finished products)
- ✓ Good adhesion to a variety of coated papers
- ✓ Fast setting speed, for lines running up to 300 cups per minute
- ✓ Flexible gluing, for side seams and radial beading
- ✓ Clean running, with no stringing
- ✓ Experienced technical support team

Applications

Adhesives for Coffee Cups

| Product | BAMFutura 10 | BAMFutura 44 | BAM 2116 |
|--------------------|---------------|---------------|-------------------|
| Technology | Universal EVA | Universal mPO | High adhesion mPO |
| Viscosity | 1,175 cP | 2,550 cP | 1,700 cP |
| Colour | Water white | Water white | Pale amber |
| Setting speed | 1 - 2 s | 0.5 - 1 s | 0.5 s |
| Boiling water test | Pass | Pass | Pass |
